DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 16 January 2009 has been entered.

Claims 1-4, 8-17, 19 and 20 are currently pending.

Claims 5-7, 18, 21 and 22 are cancelled.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 10/599,637

Art Unit: 3714

3. Claims 1-4, 8-17, 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cordero et al. (US PGPub 2001/0044339), and further in view of Pachnis et al. (2007/0218980).

Page 3

In reference to claims 1, 12 and 20, Cordero discloses: A system and method for proving a game service to a plurality of users, an online game service system comprising: a user behavior pattern database, the user behavior pattern database storing at least one behavior pattern classification reference for classifying user behavior patterns and game behavior pattern information of the users (pg 6, par 55, profile for each player); a channel database, the channel database storing random channels for at least one game and data on game rooms generated at the random channels (pg 5, par 44, lobby); a channel server, the channel server selecting one of the random channels in the channel database according to the respective users' game behavior pattern information stored in the user behavior pattern database, the channel server providing data on game rooms generated in the selected random channel, and the channel server controlling access to a selected game room when the user selects the game room (pg 5-6, par 47-51, matchmaker server). Cordero does disclose a game server (pg 4, par 35), but does not specifically disclose that the server monitors users playing of the game. Pachnis teaches that the system records and monitors game behavior pattern (pg 11, par 116).

It would have been obvious to a person having ordinary skill in the art at the time of the invention to have modified Cordero in view of Pachnis to include the user's behavior pattern as a part of the user profile.

In reference to claims 2 and 13, Cordero and Pachnis disclose the invention substantially as claimed. Pachnis further teaches based on certain behavior patterns that a user may be labeled as "fraudulent." (pg 11, par 116).

In reference to claims 3 and 14, Cordero and Pachnis disclose the invention substantially as claimed. Pachnis further teaches that a gamer may only be allows to joint entertainment-only sessions (pg 11, par 117).

In reference to claims 4 and 19, Cordero and Pachnis disclose the invention substantially as claimed. Cordero further discloses that the game may be a card game (pg 2, par 25). Pachnis further teaches that gamer profiling is based on both game and betting behavior (pg 10, par 100).

In reference to claim 8, Cordero and Pachnis disclose the invention substantially as claimed. Cordero further discloses that the matchmaker server may have stored in a database a list of available game servers (pg 5-6, par 48).

In reference to claim 9, Cordero and Pachnis disclose the invention substantially as claimed. Cordero further discloses a display device that is capable of displaying the available game servers (pg 3, par 30). Cordero also discloses the matchmaker server and matchmaker component to providing game matchmaking functionality to a player (pg 5, par 47).

In reference to claim 10, Cordero further discloses a channel determination module, the channel determination module determining a random channel that the corresponding user will enter from among the random channels in the channel database based on the users' behavior pattern classification determined by the user behavior

pattern determination module (pg 5-6, par 47-51, *matchmaker server*). Pachnis further teaches a user behavior pattern determination module, the user behavior pattern determination module determining a game behaviors patter classification of the user having selected the random channel by referring to the user behavior pattern database (pg 11, par 116, *record and monitor game behavior pattern*).

In reference to claim 11, Cordero and Pachnis disclose the invention substantially as claimed. Pachnis further teaches that the system records and monitors game behavior pattern, as discussed in reference to claims 1 and 12 above. Pachnis further teaches that the system comprises a game server with an internal processor (pg 7, par 71)

In reference to claim 15, Cordero and Pachnis disclose the invention substantially as claimed except that and empty random channel is selected when no other random channels are provided. However, it would have been obvious to a person having ordinary skill in the art at the time of the invention to create a room for players that have not been matched to play together.

In reference to claims 16 and 17, Cordero and Pachnis disclose the invention substantially as claimed. Pachnis further teaches that users may be matched by betting behavior in addition to game play behavior (pg 10, par 100).

Response to Arguments

1. Applicant's amendments to address the 35 U.S.C. 112, second paragraph rejection is noted. The 35 U.S.C 112 rejection is hereby withdrawn.

Art Unit: 3714

2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MARCUS D. JONES whose telephone number is (571)270-3773. The examiner can normally be reached on M-F 9-5 EST, Alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John M. Hotaling can be reached on 571-272-4437. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
